

KPP Series

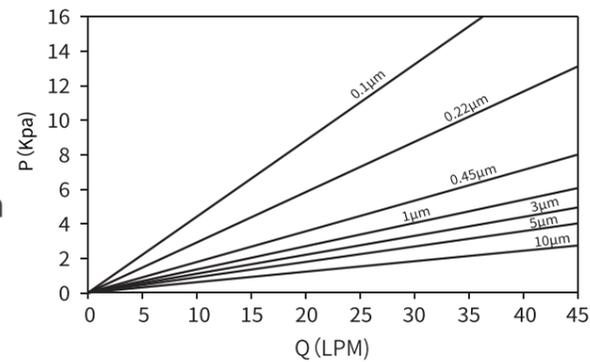

PP pleated filter cartridges are made from 100% polypropylene media, offering high dirt-holding capacity, low pressure drop, and broad chemical compatibility. They are ideal for water treatment and industrial liquid filtration with reliable and cost-effective performance.

Feature

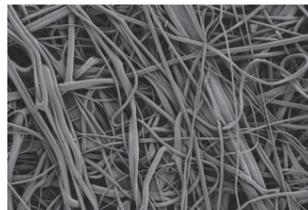

- 100% polypropylene filtration media
- High dirt holding capacity
- Low pressure drop design
- Manufactured in Class 100,000 cleanroom
- Broad chemical compatibility
- Cost-effective filtration solution

Flow- Pressure Drop Curve

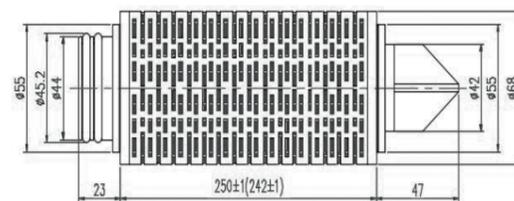

Microstructure

Media: PP 0.22µm
 Scale Bar: 20 µm
 Distance: 6.3mm
 Magnification: 500
